## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Louh (2002/0190176).

Regarding claims 1-3, Louh discloses an universal mobile phone hand free holder comprising: an adapter designed to attach to a mobile device, the adapter having one or more electrical contacts to interface with one or more electrical contacts of the mobile device when the adapter is attached to the mobile device, the adapter further having a connector portion that is electrically coupled to the one or more electrical contacts of the adapter (see fig.1, elements 1a, 2a, 3a, fig.2 elements 3, 11, fig.6, element 4 and its description); and a host device having a connector portion that is a mate to the connector portion of the adapter, wherein the connector portion of the host device has one or more electrical contacts to interface with one or more electrical contacts of the connector portion of the adapter when the adapter and host device are connected using the connector portions of the adapter and host device (see figs. 1, 3, 6 element 2a, 3, cigarette lighter (not shown) see paragraph [0004] and its description); wherein the adapter is designed to remain continually attached to the mobile device,

Art Unit: 2617

including when the adapter is not attached to the host device (see fig.6, elements 1, 4 and its description).

Regarding claims 3-14, (see figs.2-12, paragraph [0004] and its description).

3. Claims 15-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Huang (2002/0115480).

Regarding claims 15, and 23, Huang discloses an adapter set comprising:

a first interface designed to be in communication with an interface of a mobile device when the apparatus is attached to the mobile device (see fig.3, elements 33 335, and its description); and a single connector, coupled to the first interface, to allow the apparatus to be physically attached to and securely held by a plurality of different host devices, wherein the connector includes a second interface to place the first interface in communication with an interface of one of the plurality of host devices when the apparatus is physically attached to a host device (see fig.3, paragraph [0018] and its description).

Regarding claims 16-22, 24-27, and 29-30 (see figs.3-11, paragraph [0021] and its description)

Regarding claim 28, Huang discloses an adapter set comprising: means for holding a mobile device, the means for holding having means for electrically interfacing with one or more electrical contacts of the mobile device when the means for holding is holding the mobile device (see figs.3-4, elements 33, 35, 55 and its description); means for hosting the means for holding (see fig.3, element 31 and its description); and means for connecting the means for holding and the means for hosting, wherein the means for

Art Unit: 2617

connecting places the means for holding and the means for hosting in electrical contact with one another, and wherein the means for connecting further securely attaches the means for holding to the means for hosting (see fig.3, paragraph [0018] and its description); wherein the means for connecting is standard across a plurality of means for hosting, and wherein each of the means for hosting is designed to be used in different environments (see fig.3, elements 45, 51, paragraph [0021] and its description).
